Mechanalysis India Ltd	14	Rs 44
Amara Raja Electronics	15	Rs 20

Electronics manufacturing services (EMS) has been gathering a lot of momentum in India, in the last couple of years. There are a number of multinational companies like Jabil, Flextronics, Foxconn, Solectron, Celestica, Elcoteq and others who have set up their operations here during the last two to three years. This has sent out a clear signal to the world that India is evolving as a manufacturing destination. We at EFY Group, took this opportunity to rate the top 15 EMS players in India for our EB TOP 15

EB TOP10 EMS Players Globally

Company Name	Country
Foxconn*	Taiwan
Flextronics*	Singapore
Sanmina*	USA
Solectron (bought over by Flextronics)*	USA
Jabil Circuits*	USA
Celestica*	Canada
Elcoteq*	Finland
Venture	Singapore
Benchmark*	USA
Universal Scientific Industry	Taiwan

*All these companies have India operations

column, based on their country revenues. However, in this rating we are unable to include the multinational players, as they have not disclosed their country specific revenues. But then, not mentioning the big players at all, would also not be correct as it takes us away from the big picture. To overcome this dilemma, we decided to have a separate list of the global players. But we hope, as the EMS industry grows, more and more global firms would open up to share their country specific revenues. This endeavour from EFY Group is an attempt to bring forward the players who have been performing consistently well over a period of time.

1 EB TOP PG Group

Rs 5750 mn (2006-07)

PG Group recorded a turnover of Rs 5750 million in the financial year 2006-07. The company is targeting a turnover of Rs 7600 million in the current fiscal. PG Group is a dynamic multi division, multi product, high technology conglomerate that has had a resounding success in the consumer electronics industry in India. The company is all set to open a new horizon on the power of innovation. The genesis of the company dates back to 1977. Currently, it has its manufacturing facilities at Noida, Bhopal, Mohali and Roorkee. A pace-setter for the rest of the industry, PG Group with a track record of innovative technology, product development, research and development, and quality assurance, is a vital link to India's top consumer electronics brands as an esteemed OEM.
